**FISHERY ANNOUNCEMENT  
COOK INLET STATE-WATERS PACIFIC COD SEASON  
CLOSES TO POT VESSELS GREATER THAN 58 FEET IN LENGTH  
EO # 2-GF-H-03-13**

The Cook Inlet Area state-waters Pacific cod season will **close to vessels greater than 58 feet in length and fishing with pot gear effective 5:00 p.m., Monday, March 11, 2013.** The season for vessels less than or equal to 58 feet in length and fishing with pot gear will remain open until the pot allocation is achieved.

The Cook Inlet Area state-waters Pacific cod season opened to pot gear at 12:00 noon, February 11, 2013 with a guideline harvest level (GHL) of 4,074,804 pounds allocated 85% or 3.46 million pounds to pot gear and 15% or 0.61 million pounds to jig gear. The Cook Inlet Pacific Cod Management Plan (5 AAC 28.367) also restricts the state-waters season Pacific cod harvest by vessels greater than 58 feet in length and fishing pot gear to 25% of the total guideline harvest level or approximately 1.02 million pounds. Based upon current and projected harvest levels, this amount will be achieved. If there is GHL remaining after September 1, it will become available to all gear groups with no vessel size restrictions.

Fishermen are reminded that all pots must be unbaited and doors open at the time of the closure. Pots must be removed from the water no later than five days following the closure. Fish must be landed within 24-hours following the closure.
